Summery

Full-stack Developer with 4 years of experience specializing in the MERN stack. Proven ability to design and deliver scalable web applications that solve real-world problems. Strong technical foundation with a focus on practical, user-centered solutions.

Skills

Language: JavaScript, TypeScript, PHP,

Expertise: Next JS, Express JS, Redux, Moongse, ES6, React, Prisma

Comfortable: Node.js, MongoDB, Firebase,

Familiar: Mysql, Php, Wordpress

Tools: GitHub, VS Code, Vercel, Chrome Dev Tools, Figma, ChatGPT, Cloud

Experience

Aug 2023 - Dec 2023 - Full Stack Developer

CeMRD- Website Developer

- I gained interesting experience at CeMRD, managing data/admin work and keeping users information up to date. I also work with the UX/UI designer here on their online presence, social media, and design work alongside the researcher.

Projects

1. OnlineHat

[Live site](#) || [Client Github](#) || [Server Github](#)

OnlineHat is a full-stack freelancing marketplace with role-based dashboards, tiered services, secure payments, and end-to-end order management.

Technology: Next JS, Express JS, Tanstack Query, Prisma, SSL Commerce, Shadcn, Framer Motion

Feature :

- Buyers browse, order services, pay securely, and leave reviews, chat with sellers
- Sellers create services, manage orders, and track earnings.
- Admin manages users, services, orders, and platform activity and analytics

2. MediStore

[Live site](#) || [Client Github](#) || [Server Github](#)

MediStore is a full-stack pharmaceutical marketplace with role-based dashboards, AI-powered search and chatbot support, smart inventory management, secure checkout, and a modern, responsive user experience.

Technology: Stripe, TypeScript, Express JS, Prisma, Next JS, Better Auth, React Hook Form, Tankstack

Feature :

- Customers can browse medicines, manage cart, place orders, and track purchase history.
- Sellers can add, update, delete medicines, and manage inventory.
- Admins manage users, categories, and overall platform activity.
